Beskrivelse

-
-
- Measures all vital dive data, performs decompression and saturation/desaturation calculation
- Deepblu Decompression Algorithm based on the calculations on the Bühlmann ZHL-16C model
- Three Safety Factor settings for the decompression algorithm: Conservative, Normal or Progn
- Nitrox diving between 21% and 40%
- Dive Plan function for planning dives in advance
- Freedive Mode built specifically for apnea/freediving
- Bottom Timer setting with current depth gauge and overall runtime, and resettable stage time
- Sound and visual alarm warnings
- Dive logbook - saves dive data for up to 25 dives
- Wireless synchronization via Blue-tooth to upload and save dive data to the Deepblu mobile
- Free over-the-air (OTA) firmware upgrades
- 2.2-inch high-contrast LCD screen with pixel-less EBTN technology
- Rechargeable lithium-ion battery with magnetic USB connector
- Built-in clock and calendar
- Ability to adjust settings by switching the COSMIQ mobile app.

Husk at downloade DeepBlu appen .. den er ret fed ..
